

## Candidate 18765312

*Full Stack Developer*

### SUMMARY

He is a passionate full-stack developer with over four years of experience in building and designing diverse web applications, including e-commerce platforms, campaign websites, and finance back-office systems. He is proficient in a wide range of front-end and back-end technologies, including ReactJS, NextJS, NodeJS, Django, and Laravel. His experience spans developing APIs, deploying to cloud servers (AWS, DigitalOcean, Vercel), integrating third-party payment gateways, and managing databases. Jay demonstrates a strong ability to translate design specifications into functional web applications and possesses excellent problem-solving and communication skills.
